

PRESS RELEASE

New Kverneland 9671 S Evo

Kverneland unveils the new 9671 S Evo side delivery rake, featuring enhanced features.

July 2025, Kerteminde, Denmark

Kverneland 9671 S Evo in action

Kverneland is excited to introduce the 9671 S Evo rake, which includes various upgrades to enhance functionality, durability, and the overall user experience. As an important product in Kverneland's Compact Line series, the 9671 S Evo side delivery rake is designed for flexibility and efficiency in raking operations.

The machine impresses with its incredible flexibility and compact transport dimensions. It is possible to rake a large swath with the machine or to make two small swaths with the machine. The machine is ideal for small, uneven, and hilly fields, thanks to its clever design and TerraLink ground contour-following system.

The makeover introduces several cutting-edge features designed to address the continually evolving needs of modern agriculture. Key updates include:

- **The drawbar adjustment via a crank** has been redesigned for more effortless operation. Operators can now adjust from the top, using a crank. This ergonomic enhancement boosts convenience and efficiency.
- **The Cross Bar** has been redesigned. This enhancement ensures smoother operation and increased longevity.
- **New cover** to incorporate this model into the Kverneland family look and to avoid crop accumulation on top of the machine.
- **The well-proven TerraLink System** continues to provide excellent ground contouring and reliable performance.
- **Tandem wheels** as standard, providing stability, ground contour following and smooth operation in changing field conditions.
