

PRESS RELEASE

Kverneland launches the ROC RS 920 - Improved Crop Merging for Modern Farmers!

The Kverneland ROC RS 920 is designed to enhance productivity in various farming environments.

July 2025, Kilkenny, Ireland

Kverneland ROC RS 920 - Unmatched versatility

Kverneland is excited to unveil Kverneland ROC RS 920, an innovative continuous merger that aims to set new benchmarks in efficiency, reliability, and versatility for modern agricultural operations.

The Kverneland ROC RS 920 is designed to enhance productivity across a wide range of farming conditions. It features two merging units with three cams and a variable working width of 7.3 to 9.1m. Thanks to its double hydraulic rocker arm system, operators can easily adjust the spacing between pick-ups during operation for maximum flexibility.

The Kverneland ROC RS 920 stands out with its highly versatile discharge configurations. When the pick-ups are joined, they can be discharged to both sides or individually to the left or right.

When the pick-ups are separated, they offer even more flexibility, discharging to the sides, the center or a combination of both.

The machine can also function with one unit folded, making it ideal for different field conditions. Its compact transport width of just 3m and brake-free design ensures easy transport and reduced maintenance.

The primary key advantages of the Kverneland ROC RS 920 include improved farming efficiency, reduced time, and enhanced work-life, thanks to adjustable width and discharge settings for various crops and fields. Reliable and durable, it performs dependably across multiple terrains and crop types. Safety and ease of use are priorities, featuring automatic belt shut-off and integrated lights.

Further, the Kverneland ROC RS 920 carries all the well-known and unique figures of all the Kverneland ROC merger range, such as the Tandem wheel ground following system, hydraulically suspended drive axles, hydraulic suspension of the PU/belt units, hydraulically adjustable and suspended crop press rollers, and many more.

The Kverneland ROC RS 920 effectively addresses today's crop management challenges.

Kverneland is a brand of Kverneland Group

Kverneland Group is a leading international company developing, producing and distributing agricultural machinery and services. Strong focus on innovation allows us to provide a unique and broad product range with high quality. Kverneland Group offers an extensive package aimed at the professional farming community, covering the areas of soil preparation, seeding, forage and bale

equipment, spreading, spraying and electronic solutions for agricultural tractors and machinery. For more information on Kverneland Group visit www.kvernelandgroup.com
