

PRESS RELEASE

New Features on Kverneland f-drill CB F Folding Coulterbar for Greater Flexibility and Efficiency

October 2025, Soest, Germany

Kverneland has announced significant updates to its folding coulterbar, the Kverneland f-drill CB F, further increasing flexibility and efficiency in seeding operations.

As part of the integrated seeding combination, the f-drill folding coulterbar is now fully adapted to the strength and high output of the Kverneland f-drill front hopper. These improvements enhance the options of flexible and universal application of the Kverneland f-drill seeding combination, maximising the efficiency of the seeding combinations while reducing costs.

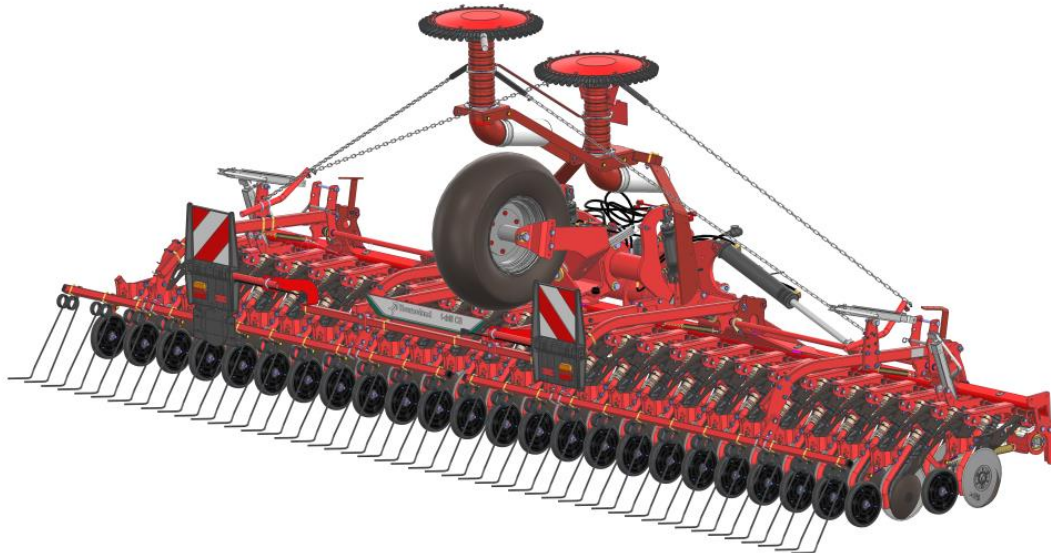

Kverneland f-drill CB F, folding coulterbar with a single distribution head

Single Distribution head – streamlined and efficient

The new configuration of the Kverneland f-drill CB F no longer requires two metering devices. Instead, a single 135mm distribution head now feeds the folding coulterbar at working widths of 5.0m and 6.0m.

This simplifies operations and allows seamless use of the folding coulterbar with the most popular model of the Kverneland f-drill front hopper range, often used for fertiliser application

in precision seeding with the Optima F. Farmers will benefit from improved efficiency, reduced complexity, and faster return on investment.

Kverneland f-drill CB F, folding coulters with two distribution heads for double-entry system

Double-entry system – now up to 6.0m working width

The powerful output of the f-drill front hopper also makes it possible to extend the double-entry coulters system, previously limited to 4.0m, to all working widths. This feature answers the growing demand for simultaneous application of seeds and fertiliser, or two sorts of seeds up to 6.0m.

Enhanced operator experience

With these latest developments, the Kverneland f-drill CB F not only boosts productivity but also enhances operators' convenience. Farmers gain a more universal and flexible solution, tailored to modern seeding needs while ensuring long-term efficiency.

Full availability from autumn 2026.

Kverneland is a brand of Kverneland Group

Kverneland Group is a leading international company developing, producing and distributing agricultural implements, electronic solutions and digital services. Productivity, efficiency, and sustainability are three important principles in today's agriculture, driving us every day to continuously develop our Agricultural Implement Technology. Kverneland Group offers an innovative range of soil

and seeding equipment, forage and bale equipment, spreading, spraying, electronic solutions and digital farm services for agricultural tractors and implements. For more information on Kverneland Group, visit www.kvernelandgroup.com
